	Title
1	System and method for integrating and validating genotypic, phenotypic and medical information into a database according to a standardized ontology
2	Temporary expanding integrated monitoring network
3	Method of simplifying & automating enhanced optimized decision making under uncertainty
4	End user customizable computer spreadsheet application based expert system
5	Method and systems for electronic assembly system pricing and customer benefit sharing
6	System, method, and article of manufacture for synchronization in an automated scripting framework
7	Multimolecular devices and drug delivery systems
8	Set definition language for relational data
9	Management training simulation method and system
10	Goal based educational system with support for dynamic characteristic tuning
11	Visualizing business analysis results
12	Business alliance identification in a web architecture
13	Method and system for property valuation in an on-line computing environment
